

16. SEPTEMBER 2011

SolidSim at the POWTECH 2011 in Nuernberg
Get to know our new and innovative system for
modeling, simulation and optimization of
complex solids processes

Dear Sir or Madam,

We would like to welcome you between October 11th to 13th in Nuernberg/Germany during the
POWTECH 2011 at our booth 8-332 in hall 8.

The current economical situation requires new and cost-effective solutions for the planning, design and optimization of production processes. Production plants have to be developed in short time frame. Changing markets require quick adaptation. Energy efficiency and product quality are in focus.

For fluid processes these task are addressed successfully using process simulation systems. SolidSim allows you to apply the established methods to processes in which solids are involved:

**Process modeling and simulation allowing for
process optimization of complex solids processes.**

Get to know SolidSim and many successful case studies. Visit us in Nuernberg at the POWTECH in
Hall 8, Booth 8-332.

We would like to take the opportunity to demo SolidSim to you. Find out how SolidSim can reduce the efforts required to evaluate solids process from the engineering as well as the economical point of view.

For deeper insight we would like to provide you with a free trial version.

Make a personal appointment to meet with us in Frankfurt at www.solidstim.com/powtech2011,
via e-mail to info@solidstim.com or by phone +49.40.76629-2360.
We are looking forward to seeing you at the POWTECH.

With the best wishes from Hamburg,

Dr.-Ing. C. Reimers

Dr.-Ing. M. Pogodda
